

Nguyen Truong Giang

Software Engineer

✉ truonggiang.ntg2000@gmail.com ☎ 0326241441 🌐 210 Le Van Thinh, Cat Lai, Thu Duc, HCMC

Passionate software engineer dedicated to professional growth, leveraging expertise in software development and enthusiasm for new technologies to drive innovation. Committed to continuous improvement, staying updated with tech advancements, contributing to dynamic projects, and excelling by embracing challenges for career advancement and organizational success.

Experience

Fresher Backend Developer (Java) - Sunshine Tech Company

Apr 2021 - Mar 2022

Stock Trading Platform Project

- Developed backend services using Java for a stock trading platform.
- Implemented WebSocket to send continuous real-time data.
- Crawled data from SSI and VNDirect stock exchanges, aggregated the data, and sent it to the main service for compilation.

Junior Backend Developer (Python) - HPT Corporation

Mar 2022 - Jun 2023

Web-Based Hospital Management System

- Developed a comprehensive web-based management system for a private hospital network with around 10 branches.
- Implemented modules for inventory management, branch management, patient management, clinic scheduling, and appointment booking.
- Utilized Python and Django for backend development, ensuring robust and scalable performance.
- Managed data with PostgreSQL, using Redis for caching and RabbitMQ for messaging queues.
- Deployed services using Docker and Kubernetes for efficient container orchestration and scaling.
- Automated build and deployment processes with CI/CD pipelines.
- Leveraged AWS services including EC2, ECR, S3, Route 53, and RDS for infrastructure management.
- Collaborated with frontend development using ReactJS and Ant Design (antd) for creating responsive and user-friendly interfaces.

Middle Backend Developer - HPT Corporation

Jun 2023 - NOW

BPM Platform Development Project

- Developed core backend services using Golang and GIN, ensuring high performance and scalability.
- Designed and implemented microservices architecture with Golang and NestJS.
- Managed deployment on Kubernetes clusters, using GitLab CI/CD for automated build and deployment.
- Utilized Docker for consistent containerized environments across development stages.
- Worked with PostgreSQL for data storage and RabbitMQ for messaging queues.

Education

University of Information Technology

Aug 2018 - May 2022

- Bachelor of Engineering
- Major in Computer science and engineering

Skills

- Javascript, Golang, Python
- ExpressJs, NestJs, Golang Gin, Django
- PostgreSQL, Oracle, Redis, RabbitMQ
- ReactJs, Redux, Antd
- CORS, Auth, SocketIO, Microservices
- RESTful API, gRPC, Message Broker
- Docker, Kubernetes, CI/CD
- AWS : EC2, S3, RDS, Route 53, ECR
